Subject: Re: 1 Is NASA misusing its funding?

Dear NASA Personnel,

Thank you for your prompt, but brief reply (see below). However, having researched further, we still maintain that NASA is the organisation that provided the content for the documentary "Earth From Space". NOVA appears to be a completely separate organisation that records beautiful imagery for videos on many science subjects, which are then distributed to the people via the American public broadcasting service. We admire the work of both these organisations.

However, we stand by all our comments below re the misleading, NASA provided, content in that documentary.

So, the question remains; why are the American taxpayers funding an organisation that, the evidence indicates, is misleading them?

Respectfully Yours

As truly independent scientists we will always debate the Science. However, we are united in our recognition and rejection of the politically driven post-normal science (such as climate alarmism)

Subject: 1 Is NASA misusing its funding?

Dear Nasa People,
NOVA People,
CPB People,
David H Koch People,

Recently we watched a documentary "Earth from Space" <https://www.youtube.com/watch?v=kpFryXQbVEA>. As described in the credits it was a created by NOVA in close contact with NASA. It was funded by the David H Koch Fund for Science and by the American people via CPB. Thank you all.

We enjoyed the documentary, but we were disappointed that, while discussing the gases that protect Earth from the Sun's radiation you omitted to mention the cooling properties of CO₂ discussed in this earlier NASA video <https://www.youtube.com/watch?v=EEFQHDSYP1I>

Also, there are some statements and images in the final section, The Human Effect, that the evidence indicates are incorrect and misleading. The instances we refer to are:

1 47 > "Looking for signs of pollution from our industries and

transportation produce more CO₂ than the Amazon Basin captures". First, Carbon dioxide is not a pollutant. Second, as the documentary indicated earlier the Amazon rainforest is initially a closed system, therefore it cannot capture more CO₂ than it emits. Third, Murry Salby's work shows the highest levels of CO₂ are actually homogenised over the Amazon rain forest and other heavily vegetated areas. So, if our cities and industries are producing excess CO₂ why isn't it homogenised there? <http://www.galileomovement.com.au/docs/jr/SatelliteObservationsOfGlobalCO2Levels.pdf>

Further, no matter which way you look at it, CO₂ comprises somewhere between .03 and .04% of the atmosphere. https://www.bing.com/images/search?view=detailV2&ccid=R%2bCrs%2fMO&id=D9CEDEB37C2EE9DE5DB9D5CE4A24CE446BDDDE7C&thid=OIP.R-Crs_MOLl09oiQk9plypQHaF4&mediaurl=http%3a%2f%2fwww.gridgit.com%2fpostpic%2f2013%2f11%2fair-composition-pie-chart_19994.jpg&exph=447&expw=563&q=Pie+Chart+of+Gases+On+Earth&simid=608031865035885150&selectedIndex=10&ajaxhist=0

This is a minuscule amount, both in substance and in comparison to the historical record https://www.bing.com/images/search?view=detailV2&ccid=D5fSYfhq&id=84072BA9AA4E50B8E405B47F6312D6B6893967CB&thid=OIP.D5fSYfhq_l_fGFWqS89rSbQEsDV&q=vincent+gray+graph+co2+vs+temperature&simid=607998449652993283&selectedIndex=0&ajaxhist=0

Further, as 97-98% is from natural sources we are measuring the accumulation of anthropogenic atmospheric CO₂ in minuscule amounts. This table shows the calculations for the decade of the 1990's <http://www.galileomovement.com.au/docs/jr/AtmosphericCO2LevelsFromThe1990s-2.pdf>

>1.49 "Satellites show ocean warming in last 30 years" More recent NASA research indicates that 30 years is not an indicator of human caused global warming of the oceans https://science.nasa.gov/science-news/science-at-nasa/2014/06oct_abyss

>1.50 The evidence shows that the alarmist, scientifically unsound statements re warming effects at the Arctic and

Antarctic are untrue.

[https://www.bing.com/search?
q=researchers+stranded+in+antarctic&form=APMCS1&PC=APMC](https://www.bing.com/search?q=researchers+stranded+in+antarctic&form=APMCS1&PC=APMC)

[https://www.bing.com/search?
q=researchers+stranded+in+arctic&q=HS&pq=researchers+stranded+in+arctic&sc=1-30&cvid=D8DD323AEAC341F58C17E3F3796BE7CD&FORM=QBRE&sp=1](https://www.bing.com/search?q=researchers+stranded+in+arctic&q=HS&pq=researchers+stranded+in+arctic&sc=1-30&cvid=D8DD323AEAC341F58C17E3F3796BE7CD&FORM=QBRE&sp=1)

<https://www.express.co.uk/news/nature/548516/North-South-poles-not-melting-Dr-Benny-Peiser>

In closing , it is disappointing that, with all the resources and funding at its disposal NASA, while it produced very impressive digitally enhanced images, could not produce a more objective and balanced documentary.

Respectfully Yours Dr Judy Ryan and Dr Marjorie Curtis
