

Background to Public letter to Professor Kenneth Baldwin

The notes for the following letter are from a recording taken at a community forum in Canberra on Wednesday 28th May 2014. The letter is an illustration of how we can use the evidence in a public email to combat Global Warming Alarmists/Advocates teaching non scientific alarmism anywhere in the World. Feel free to copy any of the text and URL links to use in your own public email. Also feel free to copy any or all of the email addresses. If you are a Mac user just “find and replace all” to change the comma separators to semi-colons.

A Public Email to a Climate Alarmist, which copies in the media, politicians and prominent skeptics is a powerful tool. The Alarmist’s untruthful quotes are then openly on the public record, therefor, they cannot ignore, or pretend they didn’t get, the email. It is not a good look for the Alarmist if they do not respond to the politely worded open invitation to correct any mistakes or untruths. But, if they do respond, what can they say! Slowly, but surely, individual Alarmists will be held accountable.
