**Subject:** [execnzcsc] Re: Do These Temperature Graphs Represent Reality? That is the Question

**Date:** 21 February 2014 10:29:49 am AEDT

**To:** David John Karoly <dkaroly@unimelb.edu.au>Dear Professor Karoly, and about 220 other observers

---

Dear Professor Karoly,

Thank you for your prompt reply.

I have included other scientists, including past and present IPCC reviewers in this reply to you. These scientists are much more conversant with the Working Group Ones final, final report than either Dr Curtis or I. But, I assure you I have read Working Group Ones final draft report, which was released to the public as an un-approved draft. Dr Curtis and I will be looking and learning as we see the evidence from the final, final report unfold.

In your response below you have stated that you are not the author of the original BOM temperature graphs. But, you have not answered the second part of the question.

It is an honest, straightforward, legitimate question.

Professor Karoly, are you the author of the BOM's adjusted/homogenised graphs shown below?

Please click Reply All and answer the question.

We look forward to your prompt response.

Respectfully yours

Dr Judy Ryan

Dr Marjorie Curtis

PS

Dr Curtis and I will appreciate your courtesy in addressing both of us in your correspondence. Marjory has been an active skeptic for more than three decades, and as many of her students know, she is a force to be reckoned with.
