

Why don't the Climate Hysteria Makers read the History Books?

**WHAT WERE THE REAL AUSTRALIAN
TEMPERATURES IN 1844?**

For those too young to remember $127^{\circ}\text{F} = 52.8^{\circ}\text{C}$

Read Stuart's own words as he describes the Australian Climate in his narrative on his Journey into Central Australia. Repeatedly he reports the Temperature.

bit.ly/sturt52C & do a cmd or ctrl find on Temperature
