Minister for the Environment
Federal Government
Australia

Dear Minister Greg Hunt,

As two mature citizens of a democratic nation we ask you the question: does the Australian Department for the Environment have a fraudulent ideology? In our humble opinion it is a legitimate question to ask at this point in history. The same question is being asked of corporate organisations in other democratic nations. The same question was asked of the executive secretary of the United Nations Framework Convention for Climate Change, professor Christina Figurers.

The event was a an ANU Fenner School; The Road to Paris - Efforts to Achieve a New Climate Change Agreement in 2015 held on Thursday May 7th. Before more than 200 witnesses professor Christina Figurers publicly agreed to go to jail if it turns out that she has been misleading or deceiving the people.

Figueres is on the public record on 3 February 2015 stating. "This is the first time in the history of mankind that we are setting ourselves the task of intentionally, within a defined period of time, to change the economic development model that has been reigning for the, at least, 150 years, since the industrial revolution,"

She is also on the public record as stating " democracy is a poor political system for fighting global warming. Communist China, is the best model.

<http://www.climatechangedispatch.com/un-climate-chief-communism-best-for-fighting-global-warming.html>

So where does the truth lie? What does communism and global economic modelling have to do with the natural climate of planet Earth? But, does it have something to do with a deceitful demonisation of carbon -dioxide; a trace gas essential for all life on Earth? Is there a associated mistaken believe that the burning of fossil fuel for energy is somehow damaging Earths climate? Will this mistaken believe result in energy deprivation for the people?

Without a reliable source of energy to our homes we are at the mercy of whatever form of governance we are subjected to. So we beg you please place the health, happiness and freedom of Australian citizens above everything else in performing your fiduciary duties.

The reason we are so concerned for our nation and our democracy is that your department seems to have an unhealthy alliance with the Bureau of Meteorology and other iconic institutions that the evidence indicates have become corrupted over time. Follow the links below to view the evidence

<http://www.climate.conscious.com.au/docs/letters/20140321/GregHunt,March2014.pdf>

on page 2, Point 1 highlighted in yellow, and point 3 below

The correspondence thread for the investigation by independent researchers into the BoM starts here <http://www.climate.conscious.com.au/letters.html> and scroll down or Search “(2) BOM - Key correspondence”

Now, to the recent events that speak to the integrity of your department.

March 25th in response to public pressure, you conducted a Technical Advisory Forum enquiry into the BoM's data management practices. Submissions from the public were not called for. It also appears that the submissions received may not have been acknowledged in a timely manner. So, the question is; were those submissions passed on to the panel members before March 25th?

We have viewed at least one of those submissions. It contains robust evidence that the BoM appears to have maladjusted some of its data. However, the one day enquiry, conducted behind closed doors has been and gone.

Since then you obtusely stated recently “We accept the science”. What did you mean?

Science is evidence based. What and where is the evidence that you are accepting, and who is we?

We give you the same promise that we gave Mr Greg Combet when he was minister for Climate Change. If this is a politically driven global scam as the evidence is indicating, it will be exposed and its perpetrators held individually accountable, no matter how long it takes. <https://www.facebook.com/GregCombetLetter/posts/437087623066122>

In closing, If there is anything we have said that you think is untrue please click ‘reply all’ state our inaccuracy and we will openly consider it and either

apologise to you or explain further. In the spirit of caring for our environment and restoring scientific integrity we look forward to engaging with you. ...

Respectfully Yours

Dr Judy Ryan & Dr Marjorie Curtis
