Australia's National Chief Scientist
Dear Dr Alan Finkel,

As you are aware on Wednesday 29th March 2017 Senator Malcolm Roberts is coordinating a Public Forum "The Climate Data-Come check for yourself" I note that you have been invited to attend.

Office of Senator Malcolm Roberts

S1.32 Parliament House
Canberra ACT 2600

10 March 2017

One Nation Public Forum: *The Climate Data – Come check for yourself!*

Dear Colleagues

You are invited to One Nation's Public Forum "*The Climate Data – Come check for yourself*" on **Wednesday 29 March** at Parliament House.

Senator Roberts and guests will deconstruct a sample out of 250+ data sets used by the United Nations IPCC. These data sets are taken from NOAA, BOM, The Scripps Institute, The Hadley Centre and other international data Centre's.

An invitation has also been extended to the Chief Scientist, CSIRO Chief Executive and staff, and the Director of the Bureau of Meteorology to attend and engage in these discussions.

Registration Details

Date: Wednesday 29 March
Time: 7.00 – 9.00pm
Where: Main Committee Room, Parliament House
RSVP: COB Monday 27 March to E: boston.white@aph.gov.au, or call 07 3221 9099

On the night

6.00pm: Arrival at Parliament House if you require signing in
7.00pm: Public Forum commences – overview of data, Q&A and discussions
9.00pm: Evening concludes

I hope you do attend for the sake of science education in Australia. I hope all the press and journalists also attend for the same reason. At all levels science education in Australia has deteriorated into pseudo science progressively over the last four decades. The disproven "Nature in Balance" hypothesis is still being taught under a subversive curriculum in Australia.

The catastrophic, but sadly predictable, result is that a completely unsuitable form of statistical analysis is used by the 'climate scientists' at the Australian Bureau of Meteorology (BOM).

However, the situation is much worse than that. The evidence indicates that, despite the climate's variability, there has been a, Lysenkoliike, pseudo-scientific funding fraud occurring since the late 1960's.

The evidence that climate scientists at the BOM have manipulated and distorted the National Climate Database is robust. <http://www.galileomovement.com.au/docs/jr/SystemGeneratedFakeData-2.pdf> This poster is based on the work of Lance Pidgeon and Jo Nova. The scenario it illustrates for the early 19th century is analogous to any individual person wearing exactly the same clothes on a specified day, over subsequent years, for decades without even realising it. I think you will agree it is totally implausible.

The second poster <http://www.galileomovement.com.au/docs/jr/NonInteracticePosterForDecember1931.pdf> is my own work. It is based on an area of central Australia slightly larger than Tasmania where nine weather stations are located. The poster is fairly self explanatory. It links to historical records showing the 1932 heatwave, where extremely high temperatures were recorded. However, they are portrayed as being between 30-33 degrees celsius on the BOM's map.

Further, it is clear from the bar charts below each station that none of them had any temperature data for the 1930's!

I, will be attending the public forum on behalf of my colleague Dr Marjorie Curtis and other Independent Scientists. I will be happy to discuss the evidence shown above with you.

Respectfully yours

Dr Judy Ryan
